ROBERT B. COOPER / Historian
P.O. Box 330, Mangonui, Far North
New Zealand
FAX: 64-9-406-1083

PROCEEDINGS OF IRE/IEEE:
Papers on hand:
Papers still required (bold face)/Added June 20, 1994 (underlined)

____1926/Vol.14/P.613/"Some Measurements of shortwave transmission"
June 1928/Vol.16/P.715/Yagi/"Beam Transmission of ultra-short-waves"
Vol.17/1929/ p.1584. "Selection of ____commercial radio television"
March 1930/Vol.19/p.471/(Esau, Hahnemann)"Report on experiments with electrical waves of about 3 meters"
June 1930/Vol.18/p.1047/Uda/"Radiotelegraohy and Radiotelephony on half meter waves"
July 1930/ "Ultra-short-waves for limited range communication" (JK)
December 1930/Vol.18/p.1998/"Solar and Magnetic Activity and Radio Transmission"
March 1931/Vol.19/p.353/"Notes on the 15 Month Period in SOlar Activity"
April 1931/Vol. 19/P.585/"Blind Landing of Aircraft"
July 1931/"A Note on the relation of meteor showers and radio reception" (JK)
August 1931/ "Application of frequencies above 30,000 kilocycles to communication problems" (Beverage et al) (JK)
January 1932/ "Historical review of ultra-short-wave progress" (JK)
March 1932/ (Originally German) "Concerning the influence of the eleven year solar-activity period uponm the propagation of waves in wireless telegraphy" (JK)
July 1932/V.20/P.1131-1149/(About Meteors)
December 1932/ "Ionizing Effedcts of meteors in relation to radio propagation" (JK)
March 1933/ (Abstract) "Notes on propagation of waves below 10 meters in length" (RCA) (JK)
March 1933/Vol.21/p.349-386/(Jones) "A study of the propagation characteristics between 3 and 8 metres"
/p.387-426/"Notes on propagation of waves below ten meters in length"
/p.427-463/(Schelleng et al) "Ultra short wave propagation"
/p.464-492/(Englund et al) "Results of a study of ultra-short-wave transmission phenomena"
June 1933/ (Abstract) "Theoretical Notes on certain features of television receiving circuits" (NOT RCA) (JK)
June 1933/Vol.21/P.833-843/(Robinson)/"Theoretical Notes on certain features of television receiving circuits"
September 1933/(Abstract) "Notes on television definition" (not RCA) (JK)
"Notes on characteristics of ultra-high-frequency transmission systems (Kraus: not complete) (JK)
December 1933/ "An experimental television system" (RCA) (JK)
"Description of experimental television transmitting apparatus" (RCA) (JK)
(Abstract) "A Study of television image characteristics" (RCA)

SCS-94 PRE-REGISTRATION

TOTAL P.01

(JK)
Robert B. Cooper/ IRE-IEEE publications list/page two:
"Description of Television Receivers" (RCA) (JK)
September 1934/Vol.22/: Check for "An Experimental Television System"
October 1934/Vol.22/: Check for "An Experimental Television System"
November 1934/Vol.22/p.1266 onward "An Experimental Television System/Part III/ The Receivers"
October 1937/Vol. 25, P. 1291-1299; "Field Strength Observations of transatlantic signals"
January 1939/"Observation of sky-wave transmission on frequencies above 40 megacycles" (BBC, German, French TV) (JK)
July 1939/ "Wide band amplifiers for television" (JK)
November 1939/ "Transatlantic reception of London television signals" (JK)
August 1940/Vol.28/p.343-351/Goldmark & Dyer/ "Quality in television pictures"
October 1940/Vol.28/p.358-368/Baldwin/"Subjective Sharpness of Simulated Television Images"
April 1942/Vol. 30/p.162/Goldmark/"Color Television"
September 1943/Vol. 31/p.465/"Color Television - Part Two"
September 1947/Vol.35/p.661/861/"Simultaneous Color Television System"
September 1947, Vol. 35, P.861-874 "Experimental Color-Pickup Equipment
September 1947,Vol. 35, p.871 "Experimental Color- Reproduction Equipment"
July 1948/ (Correspondence) "Upper atmosphere circulation as indicated by drifting and dissipation of intense sporadic-e clouds (Ferrell) (JK)
September 1950/Vol.38/p.980/ "Present Status of Color Television"
October 1951/Vol.39, p.1124: Alternate Approaches to Color Television
January 1954/Vol.42/p.326/"The CBS Colortron"
September 1956/Vol.44/p.1108-1124 (includes) "Beam Indexing in Color Picture Tubes"
May 1962/Vol.50/P.794/"A Half Century of Television Reception"
September 1976/ "A history of color television displays" (JK)
"Perspectives on television: The role played by the two NTSCs in preparing television service for the American public" (Fink) (JK)

Technical Papers:

RCA

RCA REVIEW: January 1937

RCA REVIEW: Combined updates of television technology (TELEVISION) issued at intervals from 1933 to 1950, 7 volumes in all?

RCA REVIEW/7(2): June 1946/An Experimental Color Television System

RCA REVIEW/7(4): December 1946/Simultaneous All-electronic Color Television, Progress Report

RCA REVIEW/10(4): Six-megacycle Compatible High-definition Color Television System

RCA BULLETIN: Oct. 29, 1949/15" by 20" Projection Receiver for the RCA Color Television System

RCA BULLETIN: Jan 9, 1950/Three-color Direct-view receiver for the RCA Color Television System

RCA BULLETIN: Feb 28, 1950/Simplified Receiver for the RCA Color Television System

PRACTICAL TELEVISION,1939 (40 pages)

TELEVISION (a booklet given out as a part of Radio City Tour; one version 1939, another 1940)

GE

GENERAL ELECTRIC REVIEW 54 (6): June 1951/Spectrum Utiliation in Color Television

ELECTRONICS (Magazine)

January 1947 (20)(1) Two Systems of Color Television, Fink

PROCEEDINGS OF NEC

3:549 (1947) The Chromoscope - A New Color Television Viewing Tube

NORTH HAVEN HISTORICAL SOCIETY (North Haven, Maine)

1988/ Genius At Riverhead: A Profile of Harold H. Beverage, Alberta Wallen

BROADCASTING PUBLICATIONS

The First 50 Years of Broadcasting (1982)

MISCELLANEOUS PUBLISHERS/ PUBLICATIONS

BETTER TV RECEPTION, Editors and Engineers, 1950

JERROLD Electronics Catalog # 149 (or any in similar series), 'MUL TV Antenna Systems'

THEME and VARIATIONS, Apparatus Development Co. (Ct.), 1960

TELECASTING AND COLOR, by a CBS engineer in 1946

TELEVISION FOR EVERYONE, a BBC publication in 1938/1939

JOURNAL OF APPLIED PHYSICS: (1939) "Probable Influences of Television on Society," David Sarnoff

NEWSWEEK or WALL STREET JOURNAL or TIME: late 1951, early 1952
"(the) CBS $5M COLOR BLUNDER"

FCC PUBLICATIONS

RADIO - A Public Primer, George Gillingham, 1947
